V&V Date (YYYY-MM-DD)	2007.08.13
V&V Edition	1
V&V Disposition and Status	OK
V&V Charge Time	10.312

A.2 Comments

Zeroth order has flat-topped PSF. Standard data processing software did not correctly

locate the zeroth order. Manual intervention was used to input the correct sky coordinates ($x=32816.24$; $y=32887.40$) into the *src1a.fits file table. These corrected coordinates were determined using

a software tool developed by CXC called findzero, which is expected to be

released in CIAO (currently in ISIS). The tool calculates the point of intersection of the

readout streak and the leg arm. The zeroth order source position determined by the standard

pipeline processing using the tool tgdetect was not used in this processing. The newly determined

zeroth order coordinates have been placed in the *src1a.fits file, replacing the coordinates determined by tgdetect. Note that these corrected coordinates of the zeroth order cannot be reproduced by running tgdetect on the data.
