

Chandra Verification and Validation Report

V&V Scientist: Alaine Duffy

Date (YYYY-MM-DD): 2002-04-08

Object: CTI

ObsID: 62779

Observation interval(s): 0

Processing version: 1

Instrument: ACIS

Detnam: ACIS-456789

Grating: NONE

Comments (include reasons for disposition other than OK):

Obsid is one of a group with zero telemetered events. Obsid should have been stopped prior to reaching V&V. Processing correctly handles the zero-event files.

Charge_Time (Required):

V&V Disposition and Status:

- COMPLETED OK
V&V found no problems
- HOLD
V&V detected anomaly; V&V scientist will investigate
- REPROCESSING REQUIRED
V&V detected anomaly to be resolved by reprocessing
- REVIEW REQUIRED
V&V detected anomaly to be resolved by Director's office
