V&V Date (YYYY-MM-DD)	2013.01.25
V&V Edition	1
V&V Disposition and Status	OK
V&V Charge Time	14.944

Comments

Charge time for this ObsId remains at original value of 14.944 ks, although with the current processing the charge time would have been 0 ksec. The difference is due to the fact that the fid lights were not turned on for this observation (operational error), so there is no Good Time Interval. The Level 2 event file is empty, but the Level 1 event file can be used for analysis. The lack of fid light data means there is no way to determine any misalignment between the bore sight of the telescope and the Aspect Camera.

***NOTE: The original processing version (N001) erroneously assigned a non-zero good time and populated the evt2 file with events. This was a software issue with the datamodel that was fixed with a software upgrade.
