V&V Date (YYYY-MM-DD)	2007.01.24
V&V Edition	1
V&V Disposition and Status	OK
V&V Charge Time	19.07

## A.2 Comments

For ACIS/CC-mode w/ HETG, there are no MEG even order counts. MEG even orders overlap with HEG orders in energy, but MEG even order efficiencies are very low. Since HEG and MEG cannot be spatially separated, events are preferentially assigned to HEG. (MEG odd orders can be resolved.)

Phase constraint met.

Streak correction (destreak tool) did not do a very good job in removing the column-to-column streaking in chip 8. It might be helpful to use the destreak tool on the Level 2 event data.

There is apparently a strong source in the field of view that falls on the plus side of the spectral arms and contaminates the spectral data at about 7-8 Å in heg and 14-16 Å in meg.
