Comments

Charge time for this ObsId remains at original value of 17.87 ks, although with the current processing the charge time would have been 17.900 ksec.

Spike in count rate from about 10 counts per second to about 50-60 counts per second between 12.5 and 13.5 ksec into the observation. Most of this time period is not included in the good time interval, and therefore is not in the Level 2 data products.
