

atable: tabulated additive model

An additive table model component. The filename to be used must be given immediately after **atable** in the **model** command. For example

```
model atable{mymod.mod}
```

uses `mymod.mod` as the input for the model. For specifications of the table model file, see the OGIP memo 92-009 on the FITS file format for table model files (available on the WWW or by anonymous ftp from <ftp://legacy.gsfc.nasa.gov/caldb/docs/memos> . Example additive table model files are `mekal.mod` and `raysmith.mod` in `$HEADAS/../spectral/modelData` and `testpo.mod` in `$HEADAS/../spectral/session`.

Any number of tabulated model components (additive, multiplicative or exponential) may be used simultaneously.
