

mtable: multiplicative tabular model

A multiplicative table model. The filename to be used should be given immediately after `mtable` in the **model** command. For example:

```
XSPEC12>model mtable{mymod.mod}
```

uses `mymod.mod` as the input for the model. For specifications of the table model file, see the OGIP memo 92-009 on the FITS file format for table model files (available on the WWW or by anonymous ftp from <http://legacy.gsfc.nasa.gov/caldb/docs/memos> . A sample multiplicative table model file is `testpcfabs.mod` in `$HEADAS/./spectral/session`.
