A Summary

A.1 Status

V&V Scientist	Joy Nichols
V&V Date (YYYY-MM-DD)	2009.03.24
V&V Edition	2
V&V Disposition and Status	OK
V&V Charge Time	1.515

A.2 Comments

Charge time for this ObsId remains at previous value of 1.515 ksec,
although

with the current processing the charge time would have been 1.44 ksec.

=====

Monitor constraint satisfied.=====

Aspect Review from Version 2 of the processing: The scheduled end of the HRC-S observation is 145295271.86. Normally in preparation for RAD zone entry the SIM would be translated at that time, but since the SIM is already at HRC-S nothing happens until around 145295670.86 when it appears the HRC door closed, thus making the fid lights disappear.

Recommend that you set the observation TSTOP to 145295670.86.

Technically however the true TSTOP is 145295271.8

(2002:221:15:46:47.678), satisfying the 0.9 ksec scheduled observation time.

=====Override obspar used in this processing to comply with these instructions.
