# A Summary

## A.1 Status

V&V Scientist	Jen Lauer
V&V Date (YYYY-MM-DD)	2006.06.02
V&V Edition	1
V&V Disposition and Status	OK
V&V Charge Time	19.3776258

## A.2 Comments

Window constraint met.

Due to a commanding error the wrong fid lights used here and thus fid lights have status of 'BAD'. This, in turn, leads to 0 good time for L2 purposes, and produces L2 evt files with 0 events and no GTIs. L1 data products are unaffected by this and are OK. This error is deemed to not adversely effect the goal and usability of this observation. The Charge Time is therefore taken from the L1 ontime rather than the normal L2 GTI.

The keywords DTCOR, EXPOSURE, and LIVETIME in the Level 2 event file and the

keyword DTCOR in the Level 1 event file have been incorrectly determined due to a software bug. The correct value of DTCOR can be found in the file DTFSTATS file that can be obtained by downloading the Secondary Data Products. In most cases, the difference between the correct DTCOR value and the incorrect DTCOR value in the Level 2 event file is very small and does not affect the data analysis. However, there are cases of significant differences and the user is advised to use the DTCOR in the DTFSTATS file for analysis. Corrected data products will be made available in the archive as soon as feasible.
