

V&V Summary Report

L2 ASCDS Version : 7.6.7.1

Observation 59909 - L2 Version 002
Chandra X-Ray Center

L2 Processing Date : Apr 7 2006

See [axaff59909N002_VV001_vvref2.pdf](#) for the full report

V&V Scientist	Joy Nichols
V&V Date (YYYY-MM-DD)	2006.04.10
V&V Edition	1
V&V Disposition and Status	OK
V&V Charge Time	8.33625

Comments

The fits keyword value of TIMEDEL in the Level 1 and Level 2 event file headers are incorrect in this version of the processing. The value in the event files should be 0.00285 s. This value is appropriate

since the TIMES between events can be separated by only 0.00285 s. The value of the keyword TIMEDEL in the exr0 and stat1 files is 1.4592 s, which is the correct value for these files. The data in the event files are correct. The correct value of TIMEDEL=0.00285 was used

to calculate the arrival time of each event, but the TIMEDEL value was changed in a subsequent step of the code to the incorrect value of 1.4592 s,

which was then recorded in the header. There is the potential for the event times to become corrupted if the user reprocesses the data. To fix this problem, the user should update the value of TIMEDEL in the header of their event-data file. They can do this using, e.g., dmheddit:

dmhedit infile='acisf06709_000N001_evt1.fits' filelist=none
operation=add
key=TIMEDEL value=0.00285
