# A Summary

## A.1 Status

V&V Scientist	Joy Nichols
V&V Date (YYYY-MM-DD)	2006.10.11
V&V Edition	1
V&V Disposition and Status	OK
V&V Charge Time	65.955

## A.2 Comments

Several x-ray sources are present in this field and are included in the region defining the dispersed spectrum of the target. Spectrum could be re-extracted to separate the spectra of all the sources, which would produce a more accurate spectrum and background. Zeroth order image and dispersed spectrum of V729 Cyg present, although considerably off-acis. The dispersed spectrum of V729 Cyg and possibly other sources partially overlap the spectral arms of the dispersed spectrum of the primary target. Note that the standard pipeline processing only extracts the dispersed spectral data for one source, in this case the primary target Cyg OB28A. Extraction software must be run with custom parameters to extract all the spectra from all the sources simultaneously and be sure the events are sorted into the proper source and spectral order.

Analysis will be tricky because spectra for several sources are superimposed. User could possibly exploit asymmetry in plus and minus orders.
