A.2 Comments

Due to an error, this observation was obtained with NO dithering of the spacecraft for the first approximately 75 ksec.

Dithering is standard procedure. The error was discovered and corrected after about 75 ksec and the rest of the observation was obtained with dithering turned on. For the portion of the observation taken with dithering turned OFF, the chip boundaries appear sharper and the pixel-to-pixel variations are greater than if the spacecraft had obtained the data in dither mode.
