Comments

This observation was interrupted by safing of the satellite. The observation was interrupted at day=2015:264:04:35z. The slot 2 radial offset of 0.470 arcsec is acceptable. The end of the observation also shows no irregularities due to safing. The slot 1 fid appears to be settling or shifting to a new pixel at the beginning of the observation, but this is a small effect and is acceptable.
