Window constraint met.

=====  
While previous processings of this obsid used the bad fid light in order to produce some Level 2 events, the current processing has no usable fid light data, per the aspect team. Reprocessing will not improve the observation. There are no Level 2 events because of the lack of fid light data.

=====  
The charge time remains at the original 1.5511 ksec, although the current processing would have resulted in a charge time of 0 ksec.
