Comments

Window constraint met. Slot 3 is only tracked for 90% of the observation, and is therefore marked 'BAD' and not used in the creation of the aspect solution.

The current observation has been reprocessed as part of Repro III ('C' supplement) the purpose of which is to update all HRC-I ObsIDs since Jan 2000 to the latest calibrations available for that configuration. Specifically, we are updating the DEGAP solution and the Gain Maps applied. For more information see the Repro IIIC web page at

and the associated links.
