Comments

Window constraint met. The fid light in slot 0 was dropped from the aspect solution due to poor data quality: it was only tracked for 7.83% of the observation. The fid light in slot 1 was unused in the aspect solution. The aspect team has deemed this acceptable for calibration.

The current observation has been reprocessed as part of Repro III ('C' supplement) the purpose of which is to update all HRC-I ObsIDs since Jan 2000 to the latest calibrations available for that configuration. Specifically, we are updating the DEGAP solution and the Gain Maps applied. For more information see the Repro IIIC web page at
