A.2 Comments

ACIS undercover observation, override obspar used, HRC in NEXT_IN_LINE mode. Chip is far off-axis due to calibration mode used. Window constraint met. Fids appear as flat lines because only two were used. Large fid radial offsets are because the dector is far off-axis.

This obsid was reprocessed to correct minor errors in parameters used in processing. Some of these parameters cannot be determined automatically for this observation and were derived from spacecraft telemetry.
