V&V Summary Report
L2 ASCDS Version : 8.4.5

Observation 2481 - L2 Version 3
Chandra X-Ray Center

L2 Processing Date : Sep 20 2012

See axaff02481N002_VV001_vvref2.pdf for the full report

V&V Scientist	Joy Nichols
V&V Date (YYYY-MM-DD)	2012.10.02
V&V Edition	1
V&V Disposition and Status	OK
V&V Charge Time	2.4

Comments

```
This is an observation of a moving target. Event positions are in the
reference from of Chandra, not of the comet. Users should run a
software tool such as sso_freeze to reposition the events in the
reference from of the comet, then
run normal data analysis tools such as tgdetect and spectral
extraction.
===
Standard software processing technique using the tool tgdetect failed to
determine an accurate position for the zeroth order for this
observation. The target is moving through the field of view during the
observation. The processing software defaulted to the coordinates
supplied by the user for the position of the zeroth order for the
grating spectral extraction. Spectra products from this processing,
which does not include sso_freeze, are not useful.
Charge time for this ObsId remains at previous value of 2.4 ks, although
with the current processing the charge time would be 2.393 ks.
```
