Comments

WARNING: very crowded field; this extraction is centered on tet01 Ori C, which dominates the spectrum.

=====
=====

This observation was acquired with the focal plane temperature raised from -120C to -110C, for attempted recalibration of ACIS for the 1999-09-16 through 2000-01-28 period.

=====
=====

This reprocessing of the data applies no CTI correction because none is available for that temperature.
