## A.2 Comments

No ACIS housekeeping data were collected and downlinked for this observation, do to an operational issue. The only negative impact on the observation is the lack of accurate focal plane temperature data which is used for instrument calibration. In order to process the data, ACIS housekeeping files were constructed that assumed a focal plane temperature of -119.7 degrees C. The instrument gain files are available only for -120 and -110 degrees C, so this assumption should have no impact on the currently processed data.
